US Citizen | Brooklyn, NY | (929) 475-3254 | amirjonabd5@gmail.com | amirjonabd.com | [LinkedIn/Amirjon-Abd](#) | [GitHub/Amirjon06](#)

EDUCATION:

New York University — Tandon School of Engineering

Bachelor of Science in Computer Science

Expected Graduation: May 2028

WORK EXPERIENCE:

- Octopilot AI, Software Engineering Intern | Remote

June 2026 – Present

 - Built a persistent **Flutter** theme engine for the Doc Oc editor, synchronizing application state across **20+ UI components** and resolving **15+** cross-component regressions.
 - Designed **production-ready AI Study Plan** and **Knowledge Graph** interfaces using **reusable component architecture**, **Git workflows**, and **mock data suites**.
 - Selected to lead** a team of **4+ developers** for a targeted engineering assignment, coordinating tasks and codebase integration to ensure on-time delivery.
- Sound of Earth, DevOps & Cloud Infrastructure Intern | Remote

May 2026 – Present

 - Architected** containerized CI/CD pipelines using Docker, GitHub Actions, and Linux, automating multi-environment deployment workflows to boost development productivity by **25%**.
 - Developed** Python and JavaScript monitoring dashboards for distributed services, reducing incident detection times by **35%** and mitigating release regressions by **40%**.
- Kingsborough Community College Learning Center, Computer Science & Mathematics Tutor

March 2026 – June 2026

 - Mentored **50+ students** in **algorithmic reasoning**, **data structures**, and debugging paradigms over **100+ sessions** to improve system implementation velocity.
 - Designed step-by-step learning exercises covering **recursion**, **object-oriented programming**, and algorithm implementation to translate requirements into maintainable code.

PROJECTS:

- GhostMirror — Full-Stack AI Memory Engine | React, TypeScript, TailwindCSS, FastAPI, Python, SQLite, Tauri
 - Engineered a local-first desktop memory engine using **FastAPI**, **SQLite**, and **Tauri**, indexing **500+ developer events** with semantic retrieval for sub-100ms natural language queries.
 - Developed a responsive **React/TypeScript** dashboard featuring semantic search, live event timelines, source filtering, and multi-theme support, reducing event retrieval latency by **~70%**.
- Patient Voice Bot — Real-Time AI Voice Agent Tester | Python, FastAPI, OpenAI Realtime API, Twilio API, WebSockets
 - Built a real-time **AI voice agent** integrating **Twilio Media Streams**, **OpenAI Realtime API**, and **WebSockets**, enabling low-latency conversational interactions while resolving transcript synchronization issues.
 - Designed and validated **10+ prompt-driven patient scenarios** covering scheduling, insurance, and edge cases, capturing end-to-end call flows that streamlined QA testing and reduced manual validation effort by **~80%**.
- CipherForge — Full-Stack Password Security Web App | React, TypeScript, Tailwind CSS, FastAPI, Python
 - Developed a full-stack password security application using **React**, **TypeScript**, **FastAPI**, and **Python**, implementing entropy-based strength analysis and configurable password generation.
 - Designed a responsive frontend and **RESTful backend** with efficient state management and real-time validation, delivering a low-latency user experience across desktop and mobile devices.

HONORS & AWARDS:

- Jack Kent Cooke Undergraduate Transfer Scholarship – Semifinalist

February 2026
- Honors Scholar Designation – Kingsborough Community College

June 2026
- Phi Theta Kappa (PTK) National Honor Society – Inducted Member

2024 – 2026
- Dean’s List for Academic Excellence

2024 – 2025

LEADERSHIP:

- AI, Coding, and Systems (ACS) Club — Founder

March 2026 – June 2026

 - Founded a computer science organization promoting software engineering, **AI**, and **systems programming**, leading technical workshops and collaborative development sessions.
 - Organized project-based learning initiatives and peer mentorship programs, fostering collaboration on full-stack applications, **Git workflows**, and **open-source development practices**.

PROFESSIONAL SKILLS:

Programming Languages: Python, JavaScript, C++, TypeScript, SQL, PHP
Frameworks & Libraries: React, FastAPI, Node.js, Express.js, Django, Tailwind CSS
Databases: SQLite, PostgreSQL, MySQL, MongoDB | **Developer Tools:** Postman, REST APIs, WebSockets, Tauri
Cloud & DevOps: Docker, GitHub Actions, CI/CD, Linux, Git
